MS-40 and MS-60 Sowing / Fertilizer

The MS-40 and MS-60 Seeder developed by IKEDA in partnership with EMBRAPA performs broadcast seeding of seeds, fertilizers and soil correctives, even embedded in light-weight vehicles such as motorcycles and quads.

It is equipped with 12V DC motor, common in this type of vehicle.

- Operates with all the seeds that can be planted by broadcasting.
- Ideal for application of fertilizers and correctives in small areas.
- Can be adapted in any vehicle that provides 12 Volts DC.

Details

Tank with capacity of 40 liters and 60 liters.

Dispenser regulation lever.

Seeds outlet.
