TANDEM SMDP 2 LM Cassava Up-Rooter

The Cassava Up-Rooter DP series is indicated for cassava plantations with spacing greater than 90 cm between lines.

Cutting the soil under the cassavas horizontally, loosening the soil

completely and homogeneously, allowing easy lifting of the root bunches (regardless of the soil condition), drastically reducing losses and guaranteeing supply to industries, even during the dry season.

It provides a level finish, leaving the soil ready for replanting.

TANDEM SMDP 4 LM Cassava Up-Rooter

TANDEM SMDP 1 LF Cassava Up-Rooter

Model	Number of Lines	Rods	Total Weight	Power Minimum
SMDP 1 LF	1	2 Rods with Bolt-Fuse	340 kg	70 hp
SMDP 2 LF	2	2 Rods with Bolt-Fuse	600 kg	80 hp
SMDP 2 LF/E	2	2 Rods with Bolt-Fuse	710 kg	80 hp
SMDP 2 LM	2	2 Rods with Shock Control	770 kg	80 hp
SMDP 2 LM/E	2	2 Rods with Shock Control	814 kg	80 hp
SMDP 4 LM	4	2 Double Rods with Shock Control	804 kg	120 hp
SMDP 4 LM/E	4	2 Double Rods with Shock Control	848 kg	120 hp
